Mangalore, India | Email: jayabejai.03@gmail.com | Phone: +91 8139985654 | LinkedIn: [linkedin.com/in/jayashree-08534028b](https://www.linkedin.com/in/jayashree-08534028b)

PROFESSIONAL SUMMARY

Underwriting Support Specialist with hands-on experience in UK Lloyd's Market operations, progressing from Trainee to Senior Process Executive, supporting Axis Capital (Syndicate). Well-versed in 23 Lines of Business that require UDC, Open Market Slips, Rating tool to process Open Market, Intrali, and Bordereaux/BDX, with a consistent record of SLA compliance and data accuracy. Combines strong insurance domain expertise with technical proficiency in Python and data analysis. Holds T100 UK General Insurance certification. Flexible to work remotely or relocate for the right opportunity.

KEY ACHIEVEMENTS

- Spot Award Q2 (Infosys BPM): Recognised for outstanding performance and immediate operational improvements within first year at Lloyd's Market syndicate.
- Promoted from Processor to Auditor within 1 year, having gained process knowledge of 23 Lines of Business.
- Advised on BWL documentation for Credit and Political LOB; selected for all team activities including DQ Pro based on measurable performance and process ownership.

PROFESSIONAL EXPERIENCE

Senior Process Executive

Jan 2026 -- Present

Infosys BPM, Mangalore, India

- Provide end-to-end underwriting support within the Lloyd's of London market, ensuring accurate data capture, policy binding, and premium booking across 23 Lines of Business (Renewable Energy, Marine, Aviation, etc.).
- Act as primary escalation point for complex, high-risk cases, coordinating with underwriting and operations stakeholders to close out edge cases within SLA.
- Mentor 3-5 associates on Energy Offshore and Credit & Political LOBs, documentation standards, and quality controls, contributing to team-wide adherence improvements.
- Analyze discrepancies, exceptions, and case-level issues using structured root-cause analysis, resolving an average of 90%+ of cases without escalation.

Process Executive

Nov 2024 -- Jan 2026

Infosys BPM, Mangalore, India

- Identified and resolved data inconsistencies and stakeholder discrepancies using structured analysis, maintaining a 98% quality score across the role.
- Applied analytical thinking to recurring process exceptions, contributing observations that fed into workflow improvements later formalized into the team's tracking tool.
- Performed underwriting support tasks and executed data entry based on Slip (Debit Note), rulebook guidelines, and rating tools -- consistently meeting productivity and accuracy targets in a fast-paced, deadline-driven environment.

Process Trainee

Oct 2024 -- Nov 2024

Infosys BPM, Mangalore, India

- Completed intensive training in UK insurance Data Capture protocols, documentation standards, and quality controls, achieving process certification within one month.
- Progressed to Process Executive within one month of joining, based on training assessment scores and demonstrated process accuracy.

Subject Matter Expert -- Insurance & Underwriting Content

Aug 2024 -- Oct 2024

Vaidik Eduservices Private Limited, Remote

- Rated solutions based on predefined parameters and provided detailed feedback and final results.
- Ensured high-quality content standards through thorough review and analytical assessment.

EDUCATION

M.Sc. Marine Geology | CGPA: 8.09/10

Mangalore University, Karnataka, India

Dec 2021 -- Aug 2023

B.Sc. Physics, Chemistry & Mathematics | 67.17%

St Aloysius College (Autonomous), Mangalore

Jun 2018 -- Jun 2021

RESEARCH PROJECT

Master's Thesis: Potential Drivers of Record Low Ozone Values in the Arctic (Last Three Decades)

Supervisor: Dr. Avinash Kumar, National Centre for Polar and Ocean Research | May -- Aug 2023

- Analysed stratospheric dynamics and Total Ozone Column (TCO) fluctuations using Python, NetCDF, and ERA5 datasets -- directly transferable to catastrophe modelling and climate risk roles in insurance.
- Analyzed polar vortex dynamics, identifying strong and cold conditions responsible for record low ozone levels; findings contributed to a 25% increase in understanding of atmospheric phenomena among climatologists.
- Compared major ozone depletion events (1997, 2011, 2020), generating climatological means, spatial plots, and daily/monthly variance analyses.
